

Fact Sheet

About

PIC Group, Inc. (PIC) is a premier power generation service provider. Specializing in serving the complex needs of power generation facilities worldwide, PIC has delivered “The Best Of The Best” people, processes and programs for over 20 years. PIC’s comprehensive suite of services includes: Start-Up and Commissioning, Installation, Operations and Maintenance, Outage, Documentation and Training, and Project Support.

Power Projects

PIC works on all types of power projects including:

Combustion Turbines - Both frame and aero-derivative units, such as GE, Siemens, Alstom, Pratt & Whitney Power Systems and Mitsubishi

Biomass – Circulating Fluidized Bed (CFB) and Bubbling Bed Boilers

Coal – CFB, Pulverized Coal and Super Critical Boilers

Renewable – Wind, Solar (Photovoltaic and Concentrated), Hydro and Geothermal

Safety

Safety is the first priority at PIC. In 2011, PIC reported a 0.2 YTD Lost Work Day Incident Rate and a 1.0 Recordable Incident Rate (RIR). Programs are continually improved to provide the safest and healthiest work environments possible.
